Pittsburgh Wholesale VoIP Provider to Offer International Service

VoIP Innovations Now Offers US and International Termination Services

Pittsburgh, PA, June 9, 2009 – VoIP Innovations, an IP-based wholesale communication provide, has just announced that it will now provide international outbound (termination).

As a well-known innovator in the VoIP industry, VoIP Innovations' robust network is one of the industry's most extensive carrier-grade networks. DID coverage is available in over 7,000 rates centers across the US 48 contiguous states, and now outbound (termination) service has expanded to global reach.

By expanding their services to include US and international outbound termination, VoIP Innovations' clients are able to offer their own customers with a wider array of services. With the increasing role of international business in the US marketplace, this capability will make it easier for VoIP users to complete more of their transactions via their IP-based phone system - keeping costs low, while maintaining their flexibility.

About VoIP Innovations

Located in Pittsburgh, PA, VoIP Innovations is an IP-based wholesale communication provider that understands the complexities of the industry and has shaped their model with the goal to make it as easy as possible for their clients to conduct business. VoIP Innovations' dedicated and experienced staff bring over 20 years of experience in the telecommunications industry, pioneering the early days in the retail ISP and network service business at the forefront of VoIP development.

VoIP Innovations proudly boasts one of the industry's most extensive foot print with full-redundancy for connectivity reliability. Wholesale VoIP suite offerings include US Inbound and toll-free (origination), US and International Outbound (termination), local and toll-free DIDs, and added services such as CNAM, enhanced 911 services, 411, and local number portability.
